Install metalwork in accordance with SMACNA recommendations

**(PVC) Coated Metal Gravel  
Stop / Drip Edge - Option 2**

**Detail #: PVC-1.32d**

**(PVC) Systems**

1/03

1. Cut opening into gravel stop fascia and dam leaving 1" minimum tabs on the 3 sides of the fascia that will connect with scupper sleeve.
2. Fabricate sleeve to fit opening.

3. Set tabs of sleeve in a bead of approved sealant onto the gravel stop / fascia and bend fascia tabs into the front of the sleeve into another bead of approved sealant and pop rivet into place as shown. Fabrication and assembly are to comply with SMACNA recommendations.
4. Strip in gravel stop flange according to system specification with the deck sheet.

5. Flash sleeve with unsupported flashing.
6. Treat metal joints in accordance with detail R-14.09.

Refer to appropriate edge detail for metal edge requirements - the focus of this detail is the fabrication of a gravelstop scupper.

**Custom Seal Reinforced Outside Corner Flashing**

The flashing is manufactured with one side of the corner base tab factory welded to the deck and vertical portions of the flashing and one side loose to be field welded. This configuration allows the reinforced flashing to be adaptive to a less than perfect corner angle.
